# ACCIDENTS AT WORK 2022

numbers, variables, indicators

#### Introduction

The National Social Security Institute (NSSI) presents summarized statistical information on accidents at work registered in 2022.

With the adoption of Commission Regulation (EU) No 349/2011 of 11 April 2011 implementing Regulation (EC) No. 1338/2008 of the European Parliament and of the Council on Community statistics in the field of public health and health and safety conditions of labor in relation to statistical data on occupational accidents, the methodology for statistical reporting has changed.

Since 2011, the reference (reporting) period is the calendar year in which the accident was declared in the local office of the National Social Security Institute, regardless of the year in which it occurred.

Until 2010, statistical data were provided for accidents at work that occurred during the relevant calendar year.

In this regard, the data for 2022 are fully comparable with those of 2021 and 2020. The comparison with the data for previous years informs about the trends of occupational injuries in the country.

This edition contains data on the number, distribution and indicators of accidents at work for 2022.

Comparative tables for the number and indicators of accidents at work registered in 2022, 2021 and 2020 are also attached. The distribution of accidents at work and the calculation of indicators of economic activities for the three years was carried out according to the "Classification of economic activities 2008" (NACE.BG-2008).

The distribution of accidents at work according to the classifications of the Statistical System "Accidents at Work " and the indicators of accidents at work for the year 2022 and those for the years 2021 and 2020 are presented graphically.

The source of the information are the declarations on accident at work and other documents from the accident at work files in the local offices of the National Social Security Institute.

For the calculation of the indicators for the reporting of accidents at work, the data of the National Social Security Institute on the average list number of persons insured for accidents at work and occupational diseases and the man-hours worked in economic activities were used.

The material is intended for use by state authorities, employer, trade union and other non-governmental organizations, researchers, teachers and students interested in the problems in the field of accidents at work.
